Understanding the CPA Exam Structure

The CPA exam consists of four distinct sections, each designed to test specific knowledge areas essential for a professional accountant. Understanding the structure of the exam is crucial to effectively utilize any study resource, including a CPA exam for dummies pdf. The four sections are:

Auditing and Attestation (AUD)

This section evaluates knowledge of auditing procedures, generally accepted auditing standards, and the skills necessary to conduct audits and attest engagements. It covers topics such as ethics, professional responsibilities, and assessing risk.

Business Environment and Concepts (BEC)

BEC focuses on the business environment and concepts relevant to accounting, including corporate

governance, economic concepts, financial management, and information technology. It also tests written communication skills.

Financial Accounting and Reporting (FAR)

FAR assesses the candidate's ability to understand and apply financial accounting standards, including preparation and analysis of financial statements for various entities, such as business enterprises, not-for-profit organizations, and governmental entities.

Regulation (REG)

REG covers ethics, professional and legal responsibilities, business law, federal taxation of individuals, entities, and property transactions. It demands a thorough understanding of tax regulations and legal frameworks.
