Sovereignty Defined

Sovereignty refers to the supreme authority within a territory. It is the principle that a state has full control over its affairs without external interference. The game helps students differentiate between internal sovereignty (control over domestic matters) and external sovereignty (recognition by other states and control over foreign relations).

Elements of a State

To qualify as a sovereign state, an entity must possess four essential elements:

- **Population:** A group of people residing within the state's borders.
- **Territory:** Clearly defined geographic boundaries.
- **Government:** An organized political authority that enforces laws and policies.
- **Recognition:** Acceptance by other states and international bodies as a sovereign entity.

Types of Sovereignty
