The assessment is usually conducted online and includes multiple-choice questions, practical design tasks, and problem-solving exercises. Employers rely on this assessment to filter candidates who possess both the creative flair and technical knowledge necessary for graphic design projects.

Common Question Types in the Assessment

The questions in the Indeed graphic design assessment vary but generally fall into specific categories designed to assess different facets of a candidate's expertise. Familiarity with these types can help candidates prepare more effectively.

Multiple-Choice Questions

These questions often test theoretical knowledge such as color theory, typography, design principles, and software shortcuts. Candidates must select the correct answer from a list of options, requiring solid foundational knowledge.

Practical Design Tasks

Practical tasks ask candidates to complete specific design problems, such as creating a logo, editing an image, or designing a layout. These tasks evaluate hands-on skills and creativity as well as proficiency with design software like Adobe Photoshop, Illustrator, or InDesign.

Problem-Solving Exercises

These questions assess a candidate's ability to resolve design challenges, optimize user experience, or improve visual communication. They may involve analyzing a flawed design and suggesting improvements or troubleshooting technical issues.
