Understanding Intuition in Osho's Teachings

Intuition holds a central place in Osho's spiritual philosophy, often described as a direct knowing or inner guidance beyond rational thought. For Osho, intuition is not merely a psychic ability but an expression of deep awareness and presence. He emphasized that intuition arises naturally when the mind is silent and the individual is fully receptive to the moment. This section delves into how Osho defined intuition and its role in personal transformation and self-realization.

The Definition of Intuition According to Osho

Osho described intuition as an immediate understanding or insight that does not depend on logical reasoning or external information. It is a spontaneous flow of knowledge that emerges from a state of inner silence and mindfulness. According to him, intuition is a natural function of the human mind when freed from conditioning and mental clutter.

The Role of Meditation in Enhancing Intuition

Meditation is a fundamental practice in Osho's teachings for cultivating intuition. By calming the restless mind, meditation creates the space for intuitive insights to arise. Osho often advocated dynamic meditation techniques that help release tension and allow deeper states of awareness, which are essential for intuitive perception.
