Overview of Sabre Commands

Sabre commands are alphanumeric codes used within the Sabre GDS to perform various travel-related functions such as searching flights, booking reservations, managing passenger information, and issuing tickets. These commands streamline the booking process, making it faster and more efficient compared to manual methods. A Sabre commands cheat sheet PDF typically organizes these commands by categories, helping users quickly locate the necessary commands for specific tasks.

Understanding the structure and syntax of Sabre commands is crucial. Most commands follow a consistent pattern, combining letters and numbers to represent actions and parameters. Mastery of these commands not only improves efficiency but also reduces errors during the booking process.

Reservation and Booking Commands

Reservation and booking commands form the core of Sabre's functionality. These commands allow users to search flights, display availability, and create bookings. A well-structured sabre commands cheat sheet pdf will include the most frequently used commands in this category to facilitate quick access.

Flight Availability and Search Commands

Flight availability commands help agents find suitable flights based on dates, routes, and class of service. Common commands include:

- 1. Display availability for a specific date and city pair: *1NYCLAX/15JUL*
- 2. Display availability for multiple days: *1NYCLAX*3*
- 3. Search for flights by carrier: *1AA NYCLAX/15JUL*
- 4. Show flight schedules: *FS AA NYCLAX*

Booking and Seat Reservation

Once flights are identified, booking commands are used to reserve seats and add passenger details.

Essential commands include:

- **SS** – Sell Seats: *SS1Y1* (sell one seat in economy class)
- **HS** – Hold Seats: *HS1Y1* (hold one seat in economy class)
- **NM** – Enter Passenger Name: *NM1SMITH/JOHN MR*
- **AP** – Add Phone Number: *AP NY OFFICE 2125551234*

Passenger Name Record (PNR) Management

Managing the Passenger Name Record (PNR) is vital in the Sabre system to ensure accurate and complete travel information. Commands in this category help create, modify, retrieve, and display PNR data.

Creating and Retrieving PNRs

Creating a new PNR involves inputting passenger details, itinerary, and contact information. The key commands include:

- **NM** – Enter passenger name
- **AP** – Add contact phone number

- RF – Retrieve PNR by record locator
- RT – Retrieve last PNR displayed

Modifying and Displaying PNRs

PNR modification commands allow agents to update passenger data, itinerary, and remarks. Important commands are:

- ER – End and retrieve to save changes
- ER – End transaction
- RDE – Display PNR itinerary
- RM – Remove an element from PNR

Fare and Pricing Commands

Pricing commands in Sabre are used to calculate fares, apply discounts, and display fare rules. A [sabre commands cheat sheet pdf](#) often highlights these commands to assist agents in quoting accurate ticket prices.

Fare Quote and Fare Display

These commands help display available fares and pricing options for itineraries:

- **FQ** – Fare Quote: *FQ* (displays fare for the current itinerary)
- **WP** – Price itinerary
- **FD** – Display fare rules for a fare basis code

Applying Discounts and Overrides

Agents can apply discounts or fare overrides using specific commands such as:

- **FD/DI** – Display discount rules
- **WP\$** – Override fare price

Ticketing and Issuance Commands

Ticketing is the final step in the booking process. Sabre commands facilitate ticket issuance, refund processing, and document retrieval. A sabre commands cheat sheet pdf typically includes these commands for quick access.

Ticket Issuance

Key commands for ticketing include:

- **TTP** – Ticket print
- **TWD** – Ticketing worksheet display

- WETR – Issue electronic ticket

Refunds and Exchanges

Handling ticket refunds and exchanges requires specific commands:

- TRF – Refund ticket
- TE – Ticket exchange

Additional Sabre Command Tips and Resources

In addition to memorizing commands, travel professionals benefit from customized sabre commands cheat sheet pdf documents tailored to their workflow. Utilizing printable PDFs allows for offline access during busy booking sessions. Furthermore, regular updates to Sabre commands require agents to stay informed through official training and resource centers.

Creating a Customized Sabre Commands Cheat Sheet PDF

Many professionals compile their own cheat sheets focused on frequently used commands and personal preferences. This approach enhances recall and efficiency during live transactions.

Organizing commands by categories such as booking, PNR management, and ticketing supports quick lookup.

Staying Updated with Sabre Commands

Sabre GDS periodically updates command structures and functionalities. Subscribing to official newsletters, attending training webinars, and reviewing updated cheat sheets ensure agents remain proficient. A sabre commands cheat sheet pdf should be refreshed regularly to reflect these changes.
